SECURED MONEY BY FALSE PRETENSES

Kansas City, May 13.—Charles E. Nord, a real estate broker who was arrested here several months ago on charges of securing money by pretenses, was placed on trial here today. When Nord was arrested, glowing letters, addressed to him from women in a dozen different states, reaching from New York to New Mexico, were found in his trunk. In almost every instance, the writer, be-

tween words of love, spoke of money advanced to Nord and of deals which he was supposed to be conducting for them. Many of the letters were published and some of the women wrote the local authorities denouncing Nord and asserting that he had not dealt squarely with them.

The charge, on which Nord is being tried, is that preferred by Mrs. Carrie Hamilton, a milliner formerly of Frankfort, Kansas. Mrs. Hamilton testified that Nord had persuaded her to sell her home and her millinery store, giving the proceeds to him for investment in a food preserving company in which he was interested. "I never received the stock," said Mrs. Hamilton, and afterwards I learned that no such company ever existed.

DECISION IS MADE PUBLIC BY MEYER

Attorney General Wickersham
Settles Controversy Regarding
Rear Admiral Barton

Office of Chief of Naval Bureau of
Steam Engineering Is Declared
Legally Vacant.

Washington, May 13.—A decision of Attorney General Wickersham made public by Secretary Meyer today apparently settles the controversy over the question whether Rear Admiral John K. Barton continues to hold the office of chief of the naval bureau of steam engineering. The attorney general says, in effect, that he does not, and that the post of chief of that bureau is vacant; that the rear admiral having been retired by a board of medical survey of the navy, thereby vacated the office of engineer in chief.

Chief Constructor Washington L. Capps, following Rear Admiral Barton's retirement on December 22 last was appointed to act as head of the bureau, but this appointment the secretary general says, did not fall within the provision of section 179 of the revised statutes, since the vacancy was caused, not by death, resignation, absence or sickness, but by the compulsory retirement of Admiral Barton and that the vacancy thus created can be filled only by the president pursuant to law. The designation of Admiral Capps by former Secretary Newberry was in line with the lat-

ter's plan for the reorganization of the navy and was intended only to be a temporary assignment.

The issues raised in Admiral Barton's case has been a fruitful topic of discussion in naval circles. The designation of Admiral Capps to act as head of the bureau of steam engineering revived to some extent the feeling between the officers of the line and the staff. Since the advent of the new administration, Lieut. Commander H. I. Cone, engineer in chief of the Atlantic fleet during his trip around the world, was nominated for the office of chief of the bureau of steam engineering, but the nomination was held up by the senate.

SPORTS

(Continued from Page Seven)

COAST LEAGUE.

San Francisco, May 13.—Wiggs of Oakland was responsible for Oakland's victory over San Francisco, allowing neither hit nor run off his delivery. Score: R. H. E.
Oakland 3 8 0
San Francisco 0 2 0
Batteries: Wiggs and Lewis; Corbett and Berry.

Los Angeles, 3; Sacramento, 1.
Sacramento, May 13.—Heavy hitting was the order of the day in today's game, which resulted in a defeat for the home team by Los Angeles. Two runs in the fifth gave Los Angeles the game. Score: R. H. E.
Los Angeles 3 11 1
Sacramento 1 8 2
Batteries: Hoop and Orendorff; Brown and Graham.

Los Angeles, May 13.—It was not until the seventh inning of the game between Portland and Vernon that there was any chance to pick the winner, and then Portland rolled up a total of five runs off of four bunched hits. The final score was 6 to 1.
Score: R. H. E.
Vernon 1 8 4
Portland 5 5 2

NORTHWESTERN LEAGUE.

Lincoln 1 11 3
Batteries: Jones and Sullivan; Swift and Mitze. (Seventeen innings.)

ATHLETIC SPORTS FORBIDDEN.

Sacramento, May 13.—Athletic sports on Memorial day and other exercises "inappropriate to the day" are forbidden to the soldiers of the naval guard and members of the state naval militia in a general order issued today by Adjutant General Lauck, setting aside Monday, May 31, as the date for this year's Memorial day celebration.

ARRANGING FOR BIG AT LATONIA.

Cincinnati, May 13.—Notwithstanding the Latonia jockey club case for defying the Kentucky state racing commission, is still before the Kentucky court of appeals, Attorney Harvey Myers, president of the club, is making preparations for the coming meeting at Latonia. Myers has announced that Charles F. Price will be the presiding judge and that Judge Joseph A. Murphy will be racing secretary and associate with Judge Price in the stand.

It is even declared unofficially that hand stalls will be used by the bookmakers on the track again, the same as last fall.

RAWHIDE MINES.

Rawhide, Nev., May 13.—E. W. King, president of the Rawhide Coalition Mines company, said today:

At the Dayton-Toledo lease on the Rawhide Coalition, the south drift on the 300 level this morning shows four feet of quartz that yields the biggest pannings yet secured, indicating average values of \$70. Another shipment of 20 tons is nearly ready for the Knight-Conlon mill.

The Marigold lease, also on the Coalition estate, is breaking two feet ore in the raise on the 150 level that screens between \$50 and \$400 a ton. A 12-ton shipment of this product is awaiting transportation to the Hazen sampler, while a 20-ton shipment of mill ore is being sent to the Knight-Conlon mill by this lease.

The Grutt mining lease now has its new shaft down 25 feet on the northern extension of the Marigold vein. Two feet of ore on the footwall maintains an average value of \$220 a ton. The shipping dump now contains 11 tons of this product.

The Proskey No. 1 lease is raising 10 tons daily from the stopes on the 100 level. The screenings are sampling \$120 a ton. A 20-ton shipment of \$40 ore is being made to the Murray mill.

The Grutt Balloon Hill lease on the Rawhide Queen is extracting ore averaging over \$500 a ton from the raise on the 120 level. A shipment of 25 tons was made to the Hazen sampler Saturday, and there are nearly 30 tons more on the shipping dump awaiting teams. Sack sampling indicates that the entire consignment averages \$230 a ton.

MERCUR VALUES.

Salt Lake City, May 13.—The Consolidated Mercur is making a close saving of values. Some splendid results are being obtained at the mill and smelting plant. Though the company has been opposed to any further publicity regarding operations, recent test runs have resulted in the most satisfactory demonstrations that have ever been made in the Consolidated Mercur furnaces, as the boiling out of the precious metals has been largely in the nature of a test. While the furnaces have been in actual operation the cost has been considerably below that required by the companies now operating throughout the country. The main object has been to get the values, says the Mercur Miner, and on this point it is said that the company has been most successful.

One of their engineers who has been keeping close tab on the plant, is authority for the statement that the slag ore shows that the loss in metal is only a fraction of 1 per cent, while the other methods of treatment always shows 5 per cent, or better, loss. A number of changes in the mechanical construction of the plant have been found necessary. These changes have necessarily delayed the blowing in of the furnaces for continued running.

Need Improvements.
One thing is clear to mining men and metallurgists, and that is there must be improvements made on the present system of treating ores. There are immense mineral fields in Tooele county and in the State of Utah, where the ore is of a low grade, and it has been found impractical to commercialize this product under the prevailing system of charges.

Their dumps represent five million tons of dirt, and it is said that they will pay \$3.50 a ton as pay dirt in gold. A great deal of interest is manifested in this camp, and among local operators, and it is seen that there will be increased developments in each of the mines, both in Mercur and Sunshine, while it will assuredly give employment to a number of people.

Sunshine is at present up against the Salt Lake & Mercur railroad in a very interesting scramble for the water contract which is now being considered by the railroad managers.

While silver is quoted at about 52 cents; copper cathodes at about 13 cents; lead at \$4.20 for the 100 pounds; gold, which is the metal in Mercur, always remains the same old price. The Consolidated Mercur Co. control about 40 per cent of the entire gold output of Utah county, including the stock in this and other counties, as well—and said stock never declines.

TOOELE PLANT.

Denver, Colo., May 13.—John D. Ryan, president of the International Smelting & Refining company, who is in Denver to consult with Vice President Dennis Echeby on the advisability of contesting the supremacy of the American Smelting & Refining company in Colorado, emphatically denies that any rate agreement has been entered into between the International and American companies.

"Our company will be competitive in every sense of the word," said Mr. Ryan. "We are after the business."

Mr. Ryan states that the new plant of the International company at Tooele, Utah, 35 miles from Salt Lake City, will go into commission by Jan. 1, 1930.

It is pure!

That is the one thing about Ivory Soap that is of paramount importance.

It floats; it is economical; it is available for use not only in the bath and toilet, but also for fine laundry purposes—these things are important; but after all they are secondary to the one great fact that Ivory Soap is pure soap; and nothing else.

SEVEN PRISONERS ARE FOUND GUILTY

OF CONNECTION WITH MURDER
OF THREE SHEEPMEN.

Men Who Are Confined in County Jail
Are to Be Given Early
Trial.

Sheridan, Wyo., May 13.—The state has completed confessions from two of the seven prisoners confined in the county jail here in connection with the murder of three sheepmen, Almand, Emge, and Lazier, in a raid upon their camp near Basin, Wyo., in the Big Horn country, about six weeks ago. The officers refuse to divulge the identity of the two men making confessions, but their act in removing Albert E. Keyes and Charles Ferris from the jail at Basin to this city where they arrived yesterday in custody of United States Marshal Joe La Fors is considered significant in view of the statement that the safety of the two men has been threatened by the five other prisoners at Basin. The suspects in the Basin jail are George Saban, M. A. Alexander, Herbert Brink, Edward Eaton and Thomas Dickson. All the men were recently indicted by the grand jury in Big Horn county on three counts each, charging murder.

Judge C. H. Parmelee has announced his intention of giving the seven men an early trial and states that he will call a special term of the district court at Basin for the purpose. Keyes and Ferris will be kept in the jail until the trial. Rewards aggregating \$5,500 have been offered for the conviction of the slayers of the sheepmen by the National Wool Growers Association, the Wyoming State Wool Growers' Association, the state of Wyoming and the county officials.

SAYS QUACKERY A MENACE TO CHURCH

HEALTH OFFICER MAKES AN AD-
DRESS TO EPISCOPALIANS.

Makes Attack on New Psychotherapy
Which Was Strongly Defended
by Rev. Powell.

Boston, Mass., May 13.—Quackery menacing the church was seen in the Emmanuel Mental & Spiritual Healing movement tonight by Dr. Thomas P. Darlington, health officer of New York, who made an address at the Episcopal congress.

Dr. Darlington's attack on the new psychotherapy was made during a discussion of the idea, in which it was strongly defended by Rev. Lyman P. Powell of Northampton, Mass.

"The danger of the movement is not to the medical profession, but to the churches," said Dr. Darlington. The church has at many times in the past suffered from quackery. If psychotherapy becomes a function of the church, the opportunities of such people are multiplied.

Rev. Mr. Powell said: "The Emmanuel movement is the first intelligent and systematic effort to save psychotherapy to scientific medicine by placing the responsibility on the doctor for the determination of the times and instances in which it is to be employed to save it from appropriation to the uses of schismatic cults by re-enforcing it with faith common to the Catholic and Protestant alike."

An attempt by so-called radicals in the church to have members of the other denominations invited to deliver addresses was defeated by the general committee in charge of congress.

GREAT THROG AT CONRIED FUNERAL

New York, May 13.—With impressive services, the public funeral of the Metropolitan Opera company, was held today in the building which had been the scene of his labors and many triumphs in the years of his directorate. The auditorium held a great throng. From the orchestra pit came the solemn strains of the "funeral march" from Beethoven's "Fidelio" symphony and of Chopin's "funeral march." The amen from "Parsifal," the opera which Mr. Conried produced at the Metropolitan for the first time on any stage save that of Bayreuth was sung by the choir whose voices were so often heard in the number in the operatic performances. Mesrs. Rappold and Homer and Mesrs. Martin and Blass of the opera company with the orchestra gave a choral arrangement of Handel's "Largo." Prof. W. H. Carpenter and Rabbi Stephen S. Wise delivered eulogies.

Members of the family accompanied the body to Cypress Hills cemetery.

TUBERCULOSIS HAS INCREASED 33 PER CENT.

Washington, May 13.—That the vigorous campaign against tuberculosis has failed to check the great white plague was the startling charge made today by Nathan Straus, the New York philanthropist, at the fifth annual dinner of the National Association for the Study and Prevention of Tuberculosis.

Mr. Straus backed up his assertion by official statistics from the New York health department, showing an increase of 33 per cent in two years in cases of tuberculosis in the city that Dr. Koch described as leading the whole world in the fight against the disease.
